Ideation Phase
Brainstorm & Idea Prioritization Template

Date	14 October 2026
Team ID	
Project Name	Metro Ticket Generating System
Maximum Marks	4 Marks

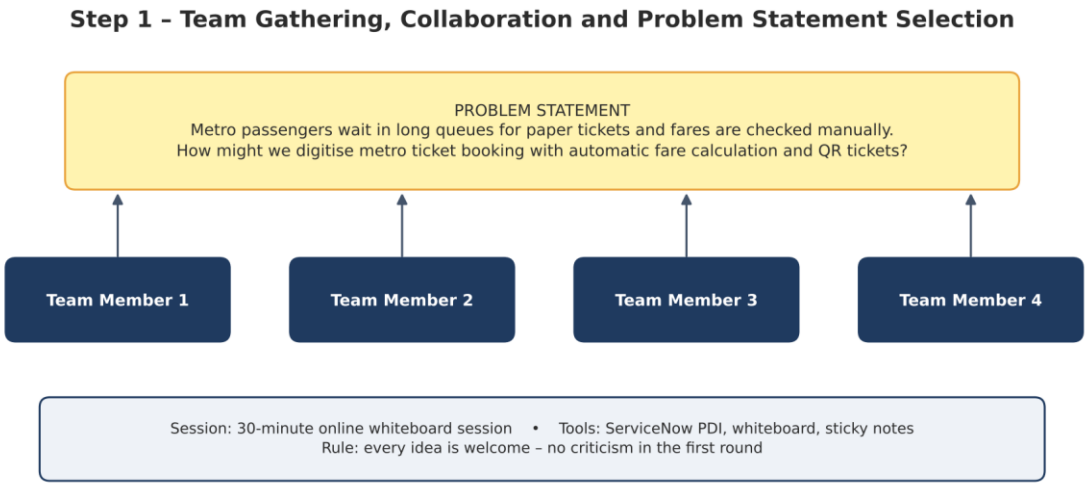

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

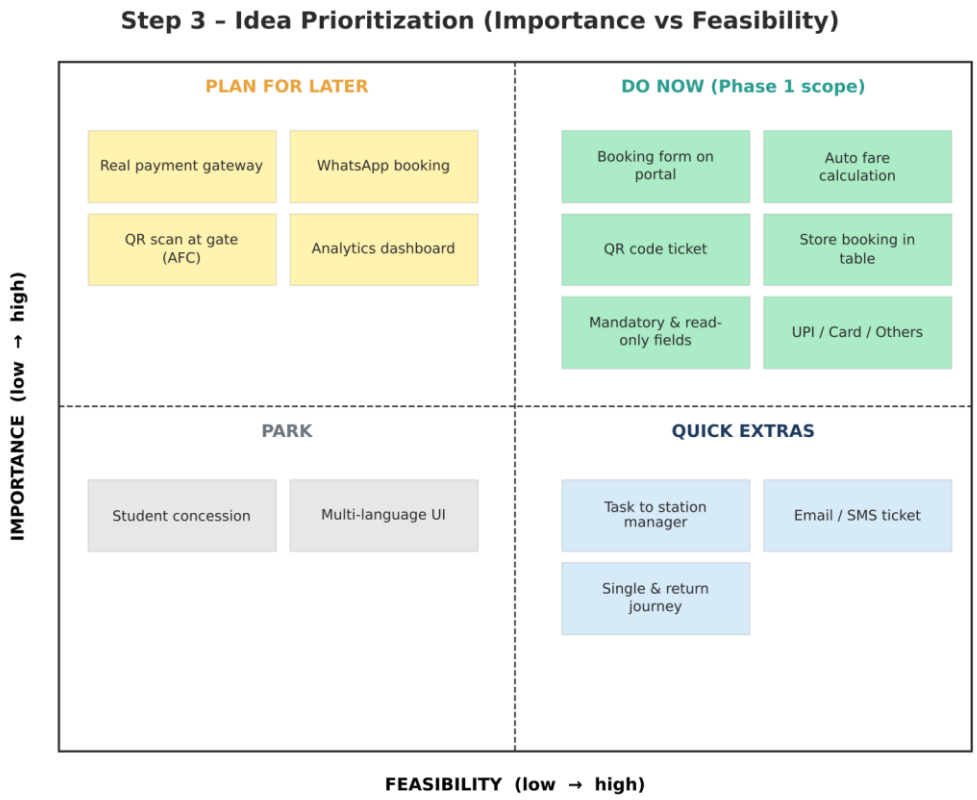

The team (Team Member 1 to 4) met in an online whiteboard session and selected the problem: metro passengers wait in long queues for paper tickets and fares are checked manually.

Step-2: Brainstorm, Idea Listing and Grouping

All ideas were written on sticky notes and grouped into six themes: booking channel, fare logic, digital ticket, payment, operations & data, and security & quality.

Step-3: Idea Prioritization

Ideas were placed on an importance vs feasibility grid. The ‘Do now’ ideas form the Phase 1 scope built in ServiceNow: booking form on the portal, automatic fare calculation, QR code ticket, payment

mode selection, mandatory and read-only fields, and storing every booking in a table. Payment gateway, WhatsApp booking, QR gate scanning and analytics dashboards are planned for later.
