Ideation Phase
Empathize & Discover

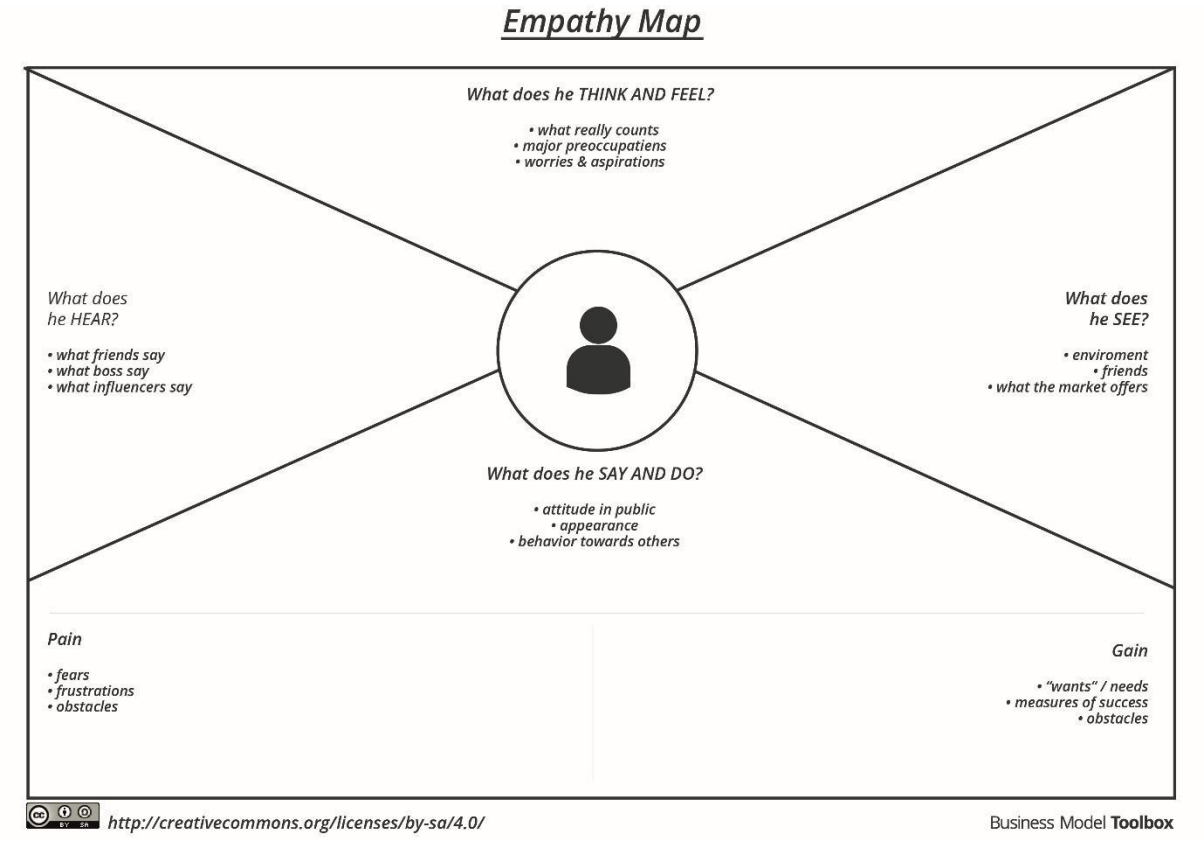

Date	14 October 2026
Team ID	
Project Name	Metro Ticket Generating System
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

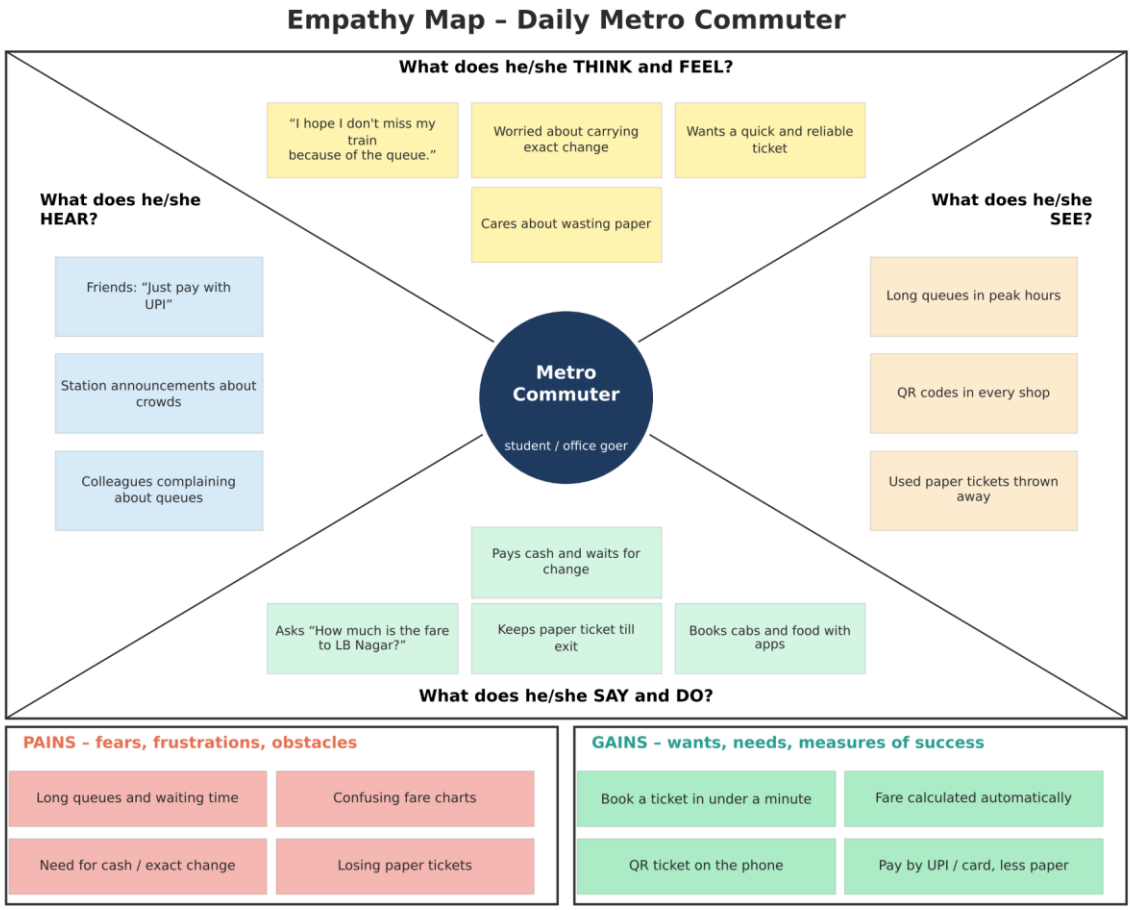

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map: Metro Ticket Generating System (User: Daily Metro Commuter)

Key insights from the empathy map:

• Passengers lose time in ticket queues and worry about carrying exact change.

• They already trust UPI and QR codes in daily life, so a QR ticket feels natural.

• They want to know the fare before travelling, without asking staff or reading charts.

• Station managers need a single place to see and verify every booking.

• These insights led to the solution: an online booking form with automatic fare, an instant QR ticket and bookings stored in a ServiceNow table.
