Project Name	Metro Ticket Generating System
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Text Input Validation (Enter payment mode)	Select Mode of Payment = Others; try Order Now with the field empty, then type 'Metro Card'	Field appears and is mandatory; empty value blocked; valid text accepted	Field appeared only for Others; empty value was blocked; 'Metro Card' accepted	Pass
FT-02	Number Input Validation (No of Passengers)	Open the select box; try Order Now with no value selected	Only 1–4 can be chosen; empty value shows mandatory message	Only 1, 2, 3, 4 available; empty value showed mandatory message	Pass
FT-03	Content Generation (fare amount and QR ticket)	Ameerpet → LB Nagar, Single Journey, 2 passengers, UPI → Order Now → Checkout	Amount = 100 and a QR ticket is generated	Amount 100 shown; QR popup displayed	Pass
FT-04	API Connection Check (QR Code API)	Click Order Now; check the QR image loads; scan it with a phone	QR API returns an image that can be scanned	QR image loaded in metro_qr_widget; phone scan read the ticket link	Pass
PT-01	Response Time Test	Select passengers and note when the fare appears; click Order Now and note	Fare and QR should appear in under 3 seconds	Fare appeared immediately; QR popup appeared within a few	Pass

		when the QR appears		seconds (manual check)	
PT-02	API / Flow Speed Test	Place several bookings one after another	Each booking gets a QR, a REQ number and a completed flow without slowing down	Every test booking showed the QR, created a REQ and the flow state was Complete	Pass
PT-03	File Upload Load Test	Not applicable – the booking form does not use file uploads	—	Not applicable	N/A
